22	ADVACED SUB ARRAY PROBLEM You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance	38R23CD
10,3B,	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance	-001
	from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the	13CD001
BR23cDf	multiplying the position with the distance from the basket	0
BRIV	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a contiguous subarray of size K from the given array.	,0013BP
2	Note:	
3000013	* A subarray is a contiguous part of array.	3BR23CD
	* Assume 1 based indexing.	381
BRI	* The array contains both negative and positive values.	(
501	* Assume the player is standing on a cartesian plane.	13CD001
25		
5BR23CDF	- input1:An integer value N representing the number of shots made by the player	BRI
5	- input2 : An integer K representing the size of subarray - input3 : An array of integers	0013BR7
